|--|--------------|
| <i>Foreword</i> .....                          | <i>xi</i>    |
| <i>Preface</i> .....                           | <i>xiii</i>  |
| <br><i>I. IMAP Fundamentals</i> .....          | <br><i>1</i> |
| <br><i>1. The Internet Mail Model</i> .....    | <br><i>3</i> |
| What Is the Internet Mail Model? .....         | 3            |
| Why Follow the Internet Mail Model? .....      | 10           |
| Examples .....                                 | 12           |
| <br><i>2. What Is IMAP?</i> .....              | <br>16       |
| IMAP in a Nutshell .....                       | 16           |
| IMAP's Three Interaction Models .....          | 17           |
| Why IMAP? .....                                | 20           |
| IMAP and POP: A Comparison .....               | 24           |
| Present and Future of IMAP .....               | 32           |
| Open Source Server Implementations .....       | 33           |
| IMAP-Related Standards and Documents .....     | 35           |
| <br><i>3. Anatomy of an IMAP Session</i> ..... | <br>37       |
| IMAP Session Concepts .....                    | 37           |
| IMAP Components .....                          | 39           |
| An IMAP Session Play-by-Play .....             | 42           |

|   |            |
|---|------------|
| <b>II. IMAP Mail User Agents (MUAs)</b>         | <b>49</b>  |
| <b>4. IMAP Clients</b>                          | <b>51</b>  |
| Client Features                                 | 51         |
| PINE and PC PINE                                | 55         |
| Star Mail                                       | 61         |
| Netscape Messenger                              | 66         |
| Outlook Express                                 | 69         |
| Mulberry  | 71         |
| Eudora  | 75         |
| Other Clients                                   | 77         |
| <b>5. Web-Based IMAP Clients</b>                | <b>79</b>  |
| What's a Web-Based IMAP Client?                 | 79         |
| Why Use a Web-Based IMAP Client?                | 80         |
| Web IMAP Clients                                | 83         |
| IMP   | 84         |
| Mailspinner                                     | 89         |
| SilkyMail                                       | 93         |
| EMU 3   | 96         |
| WING  | 101        |
| <b>III. The Cyrus IMAP Server</b>               | <b>105</b> |
| <b>6. Introduction to the Cyrus IMAP Server</b> | <b>107</b> |
| History of Cyrus                                | 108        |
| Cyrus Concepts and Features                     | 111        |
| Cyrus Server Configuration                      | 118        |
| The Future of Cyrus                             | 121        |
| Strengths and Weaknesses of Cyrus               | 122        |
| When Is Cyrus the Right Choice?                 | 123        |
| <b>7. Installing the Cyrus IMAP Server</b>      | <b>125</b> |
| Software Prerequisites                          | 125        |
| Hardware Note                                   | 126        |
| Where to Get the Software                       | 127        |
| Supported Platforms                             | 128        |
| Installing Cyrus                                | 128        |
| Upgrading from Previous Versions of Cyrus IMAP  | 133        |

---

|  |            |
|--|------------|
| Components of Cyrus and What They Do .....                   | 134        |
| Common Problems .....  | 136        |
| Significant Bugs .....                                       | 136        |
| <br>   |            |
| <b>8. <i>Configuring the Cyrus Server</i> .....</b>          | <b>137</b> |
| IMAP Configuration File and Directory .....                  | 137        |
| Configuring the Authentication Mechanism .....               | 141        |
| Configuring syslog .....                                     | 145        |
| Configuring the MTA .....                                    | 145        |
| Getting Cyrus Up and Running .....                           | 151        |
| Testing Your Server .....                                    | 151        |
| <br>   |            |
| <b>9. <i>Cyrus System Administration</i> .....</b>           | <b>154</b> |
| Cyrus System Administration with cyradm .....                | 154        |
| Common Tasks .....   | 156        |
| Batch Account Maintenance with cyradm .....                  | 163        |
| Shared Folders and Bulletin Boards .....                     | 167        |
| Mailstore Partitioning .....                                 | 171        |
| Quota Maintenance .....                                      | 173        |
| Disaster Recovery .....                                      | 174        |
| Migration from Berkeley (Unix) Mailbox Format to Cyrus ..... | 179        |
| Mail Forwarding and Filtering on a Black Box .....           | 191        |
| Usenet Integration .....                                     | 197        |
| Troubleshooting .....  | 199        |
| Adding SSL Support to Cyrus .....                            | 201        |
| <br>   |            |
| <b>IV. <i>The UW IMAP Server</i> .....</b>                   | <b>203</b> |
| <br>   |            |
| <b>10. <i>Introduction to the UW IMAP Server</i> .....</b>   | <b>205</b> |
| What Is UW IMAP? .....                                       | 205        |
| UW's Strengths .....   | 208        |
| UW's Limitations .....                                       | 209        |
| UW IMAP Concepts .....                                       | 211        |
| Does UW IMAP Match Your Needs? .....                         | 217        |
| <br>   |            |
| <b>11. <i>Installing UW IMAP</i> .....</b>                   | <b>223</b> |
| Where Do You Get UW IMAP? .....                              | 223        |
| What Do You Get with UW IMAP? .....                          | 227        |
| How Do You Install It? .....                                 | 229        |
| Where Can You Go for Help If You Get Stuck? .....            | 233        |
